

Mission Statement

At Bounce Back Physical Therapy our mission is to provide individualized quality care to every patient. We believe in a hands-on approach to your treatment. Our goal is to ensure that each of our patients receive the highest quality care so they can maximize their potential. We have a friendly and compassionate staff that will guide you in your rehabilitation so you can return to an active, healthy

What Makes Bounceback Physical Therapy so Different?

We believe that we have a higher standard of care than any other rehabilitation facility. We are a husband and wife owned and operated clinic. At Bounce Back, we focus on individualized care and treat our patients like family. We listen to their needs and concerns and closely monitor their treatment time with us. We do our work closely with each patients physician, but most importantly we work independent of him/her. We are not affiliated with any orthopedic or physician's office which allows to keep our setting small and intimate so you do not get lost in the crowd.
